PANAMA CANAL WORK.

Programme of Its Construction Described by Walter Wellman.

The work of constructing the Panama canal will naturally be separated into three grand divisions, considered from the engineering and purely constructive standpoint, says Walter Wellman in the American Monthly Review of Reviews. First is the comparatively simple matter of completing the excavation along the level stretches and including the famous Culebra cut, which, though a big operation, is not at all complicated or difficult. Second is the building of the Balin dam, which is to create the interior fresh water lake. This calls for engineering skill of the highest order, and it is possible that the commission may decide to do this part of the work itself instead of letting it out to contractors. It is well known that this is the only phase of the project which gives the engineers any anxiety, for they realize its difficulty and delicacy. Probably also American workmen will be sent out to build this dam, as it requires the touch of skillful and experienced hands and cannot be left to Jamaica blacks or Chinese coolies. The third division will be the construction of the locks and the harbors and piers at the ocean ends of the channel.

But apart from all this is the task of disposing of the flood waters of the Chagres, the sanitation of the entire district, the drainage of vast marshes, the effort to mitigate the mosquito pest and danger, the introduction of an ample supply of fresh water and the civil and judicial administration of the canal zone, with its population a year or two hence, or perhaps forty or fifty thousand rough and ignorant people. It is quite apparent that the members of the Isthmian canal commission are going to have their hands full during the next few years.

AN INVITATION FROM RICKERT & WELLS.

Leading Barre Druggists Urge You to Try Hyomel, the Guaranteed Cure For Catarrh.

Any reader of the Times who suffers with catarrh, or who is subject to catarrhal colds, is invited to the Red Cross Pharmacy for a complete Hyomel outfit on approval. So confident are Rickert & Wells that Hyomel will cure the worst and most deep-seated case of catarrh that they will furnish a full month's treatment of Hyomel on trial.

While it would be unreasonable to expect a chronic case of catarrh, which has been growing worse for years, could be cured within a month, yet they feel sure that the thirty days' treatment will convince the user that Hyomel is infallible in driving catarrhal poison from the system. There is no dangerous stomach drugging when Hyomel is used. Simply breathe its healing balsams through the neat inhaler that comes with every outfit, and the germ-killing and health-giving air will penetrate to the most remote cells in the air passages of the head, throat and lungs and drive catarrhal poison from the system. Nothing else will so quickly cure a cold in the head or stop an ordinary cough.

Singers and public speakers will find Hyomel invaluable. It strengthens the voice and gives it a rich, clear tone. Catarrhal deafness is cured when Hyomel and the special Hyomel balm is used. The complete outfit costs only one dollar, and if, after using, you can say that it did not help you Rickert & Wells will return your money.
